Los Angeles, CA 90065

John,

I just wanted to thank you again for doing such a terrific job on my restaurant. The construction was top notch, and this was the first time in my life that working with a contractor actually seemed simple rather than complicated with endless frustrating details.

In addition, your professional advice regarding such crucial operations elements as the flow of space, choosing the proper POS system and the BOH equipment for maximum efficiency, as well as the overall design (including your great recommendation for the big screen TV showing upscale food images), were invaluable. I feel like I got a business consultant as well as a contractor for the price of one!

Anyway, thanks again. I'll be back in touch soon, as we're already starting to plan our second location.

Best regards,

Mark Kulkis  
President
