

Through the years and by now through the three of my projects, I have been very pleased by John Murawsky and his team at CalAsia.

I sincerely appreciate his keen understanding of how to approach a project from the budgeting phase to realization, his long years of experience in the field and his dedication always give me a sense of -somewhat relaxation- knowing that the project will be well managed and delivered within schedule.

John is very responsive and attentive to anticipate issues and communicating things through to my team and always having a well-thought solution to the ever arising challenges that occur while building a restaurant.

I have recommended CalAsia often times to others because of our satisfaction with their service. I am very much a creature of habit and when I develop that kind of trust I tend to go back to same people over and over again.

I hope I have the opportunity and the blessing to build more restaurants in the future and I look forward to doing business with CalAsia for years to come.
