Seoul Sausage Co. on CalAsia Construction:

Dear whom it may concern,

Our relationship with CalAsia started with a simple word-of-mouth recommendation from our neighbors at Sawtelle for our store #1.

We were at first very impressed with CalAsia's **experience**. One look at their list of projects they've worked on and it will surprise you with who they've worked with.

During the bidding process we got to witness their **attention to detail** that they've amassed with their extensive experience building out all kinds of restaurants both big and small. This was crucial for first time restaurateurs like us.

Once construction began, their **quality of work** began to shine. From the way John handled big matters into calm, reassuring resolutions, to his awesome team who gave you realistic expectations and met deliverables(keeping project on track), to the actual execution of the build out itself, we were very impressed to say the least.

Currently we are building out store #2 with CalAsia and I don't see us going anywhere else for any subsequent projects. We will endorse John & CalAsia team any day. They are true partners and will come to bat for you.
