CalAsia Construction Inc.

It was indeed an exciting, energetic and motivating collaboration to work with CalAsia Construction in XOC Tequila Grill and Tacoxoc restaurant projects at the Westfield Topanga Village in Woodland Hills CA.

We are an exploration and innovation architecture and interiors firm, and need to work with builders and contractors that get that, as well as being very respectful of budget and timeline, and Calasia does it all. From the solid management team to the quality on subcontractors we were very happy with the interpretations of our design, the proposed solutions for the multiple challenges, and the general execution of our design intent and the unusual and one of a kind design elements that were successfully implemented in this project by CalAsia' team.

I have been fan of CalAsia's work in other hospitality projects for a while, and when the opportunity aroused I did not hesitate to recommend them to our clients, and after this experience I look forward to do it again.

Salud!
